SP-60HA Mixer

Specifications

● **Motor** <<<<<<
3 HP (1500W), grease packed ball bearing, air-cooled,
230V/50Hz/1Ph, 220V/380V/3Ph

● **Controls** <<<<<<
Spar Mixer controls are front-mounted to give easy access in cramped kitchen environments. The following controls are standard on all Spar Mixers: separate start and emergency stop buttons so operators can shut down the mixer immediately in an emergency situation, a 15-minute timer which shuts off the machine after set time has elapsed, and thermal overload protection

● **Cord and Plug** <<<<<<
Both single phase and three phase are hard wired

● **Transmission** <<<<<<
Heat-treated, hardened alloy, precision milled gears operate with planetary action. Gears are packed in a long-lasting, high pressure grease. Planetary gears are driven by an oversized cog-wheel, which is in turn driven by a cogged belt powered by the motor drive shaft. Cogged belt is a long-lasting, rugged fibre/rubber composite. This unique design yields high-torque mixing power while avoiding the high cost encountered repairing direct-drive transmission components.

● **Speeds** <<<<<<

Speed	Agitator rpm	Slicer/Grinder rpm
Low Speed	99	60
Intermediate Speed	176	108
